

## A few examples of the applications of the “self-regulating sprocket”:

Steel, metallurgical and aluminium industries	Conveyor and lifting technology	Ship unloader
<b>Passenger transportation, such as escalators</b> 	Escalators and moving walks in subways, stores, airports, etc.	Elevators
<b>Mechanical and plant engineering</b>	Bulk goods industry	Reclaimer systems
Wet deashers, for example, for power plants	<b>Paper industry</b> , for example, printing machines	<b>Cement industry</b>
Bucket elevators	Trough chain conveyors	Elevator discharge conveyors
Storage place devices	Filter discharge conveyors	Crushing plants in quarries
Filter-ash conveyors	Grain elevator	Dosing feeders
Separating conveyorsystem	Hopper discharge conveyors	Bridge scrapers
Continuous conveyors	Bucket chain dredgers	Heavy plate conveyors
Insulation industry	Chemical industry	Pharmaceutical industry
Glass industry	Glass recycling facilities	Electronic industry
<b>Automobile industry</b> for cars, trucks, bicycles, motorcycles, as also for example, painting line, cross conveyors, longitudinal conveyors	Roller coaster and water rides	Bearing industry for paternoster systems, Transport of car tyres, etc.

Water treatment and waste water treatment	Recyclable material sorting plant	<b>Recycling</b>
<b>Timber industry</b> Conveyor processes in the timber industry, such as for example, for log transport, transport of planks, use of chip conveyors, in the furniture industry, in planing mills, etc.	Woodworking machines  <b>Chainsaws</b>  	Sawmills
Coal-fired power plants	Biogas plants	<b>Mining</b>
<b>Agriculture</b>	Agricultural machinery	Transport of fertilisers, etc.
Forestry and garden	Fertilizer production	Roads and civil engineering
<b>Food industry</b> (in manufacture and processing)	Beverages industry	Slaughtering industry
Aerosol cans and tube industry	Palm oil industry	Mill building (scraper chains)
Bottle cleaning systems	Metalworking industry	Incineration plants
Earth-moving and surface mining machines  	Weir and sluice systems	Wind power
Pig iron preparation	Pig iron shaping	Transport of slabs and long products
