Mr. Minister

Peter Altmaier

- personally

c/o Federal Ministry for

Economy and Energy

Scharnhorst road 34-37

10115 Berlin

**Possible savings of billions of euros for operators of all systems
operated with chains**

Conservation of environmental resources

My letter of 8 April 2019

Dear Minister Altmaier,

I had informed you on April 8, 2019 about the two "self-adjusting sprockets" I had developed, which have been in perfect working order for 18 years at the Ensdorf power station in your home town.

Since I am always approached by interested operators, where one can buy these sprockets, I take the liberty to ask myself today whether you have read my letter.

As far as the construction and distribution of the "self-adjusting sprocket" is concerned, in my opinion the chain industry is in demand, which of course has no interest in marketing, who is withdrawing from their own business and what do the operators care about?

I and a number of operators would be interested in your opinion on this and I would like to ask you again to reply to my letter of 8.4.2019, which I enclose again as a precaution if it has not reached you.

By the way, the English version of my book "**Erfinder mit langem Atem**" will be available shortly, which I will publish as a PDF file on my homepage.

I take the liberty of informing a small selection of operators of this letter by e-mail and look forward to your reply.

For today, I remain

kind regards

Karl Herkenrath

Attachment: Copy of my letter of 8.4.2019
