

Cancellation of 4 intellectual property rights in November 2019
Patent "Self-adjusting sprocket - EP 2594824".

Dear management,

This is my last circular today, as I have decided to cancel four of the remaining five intellectual property rights in November 2019 on 25 October 2019.

I have now been making the "self-adjusting sprocket" public worldwide for 4 years; it is used in many non-patented countries and I have achieved what I have been striving for from the outset to make this sprocket, which contributes to significant savings for operators, widely available.

In which country the "self-adjusting sprocket" may not be used in the end, you can find out at the beginning of November on my homepage. Let yourself be surprised whether it remains protected in Austria, France, Italy, the Czech Republic or in Germany.

On 26 October 2019 my two e-mail addresses will also be switched off. If you would like to contact me after this date, please write to my address below.

Information about the patent as well as my new book "Inventor with long breath" can be found on a homepage: www.selbsteinstellendes-kettenrad.com.

Yours sincerely

Karl Herkenrath
